

SUNYU Technology Co., Ltd.: Innovating Digital Education with Technology

Founded on Innovation

Established in 2020, SUNYU Technology Co., Ltd. is dedicated to developing innovative products and holds proprietary patented technology, including **AutoMedia**. Our technology enables one-click conversion of presentations into video content, simplifying the digital learning material creation process. We help businesses and educational institutions rapidly digitize content, making knowledge dissemination faster and more efficient.

Focused Expertise, Serving Diverse Markets

SUNYU Technology specializes in three key areas:

1. **Software Development** – Providing customized solutions for government agencies and enterprises.
2. **Integrated Digital Services** – Assisting traditional businesses in digital transformation to enhance market competitiveness.
3. **AI Applications** – Combining speech synthesis technology with digital learning content creation for more flexible solutions.

AutoMedia: Transform Presentations into Videos with Ease

With **AutoMedia**, users can effortlessly convert PowerPoint presentations into videos with subtitles and voiceovers—no complex operations required. This significantly reduces video production costs while meeting the demands of corporate training, e-learning, and brand promotion. **AutoMedia** helps businesses and educational institutions create digital content efficiently, saving time, effort, and costs.

Partnering for a Digital Future

The digital education and corporate digitalization revolution is just

beginning, offering limitless possibilities. We invite you to join us in exploring this dynamic and innovative digital world—together, we can shape a smarter and more connected future.
