APTO Joins Japan Deep Learning Association (JDLA) as a Regular Member

Tokyo, January 27, 2025 —

APTO, Inc. is pleased to announce that it has officially joined the **Japan Deep Learning Association (JDLA)** as a regular member.

The JDLA, headquartered in Chiyoda-ku, Tokyo, is chaired by Professor Yutaka Matsuo of the Graduate School of Engineering at The University of Tokyo.

Joining JDLA strengthens APTO's commitment to advancing deep learning technology and supporting the healthy growth of Japan's AI industry.

About the Japan Deep Learning Association (JDLA)

The Japan Deep Learning Association (JDLA) was founded to drive Japan's industrial competitiveness through deep learning technology.

Led by companies and experts whose businesses center around deep learning, JDLA promotes the industrial application of AI, develops talent, advises public and private institutions, engages in international collaboration, and fosters dialogue between AI technologies and society.

As a member, APTO looks forward to contributing to JDLA's initiatives and continuing to promote the responsible and impactful use of deep learning technologies across industries.
