

## **Taption to Showcase AI Subtitling and Multilingual Translation Solutions at InnoVEX 2026**

Asia's premier international startup exhibition, **InnoVEX 2026**, is set to take place from June 2 to June 5, 2026, at the Taipei Nangang Exhibition Center. This landmark event will assemble startups, investors, and technology leaders worldwide to showcase breakthroughs in artificial intelligence, semiconductors, smart applications, and digital transformation, reinforcing its position as a vital hub for global industry exchange.

Taption, an AI SaaS startup specializing in speech-to-text and video subtitling technologies, is dedicated to revolutionizing video production efficiency. Its comprehensive AI-powered platform integrates high-accuracy speech recognition, automated subtitle generation, and sophisticated translation engines. By streamlining traditional post-production workflows, Taption enables media organizations, educational institutions, and enterprises to produce multilingual content at scale, significantly enhancing global information distribution and content accessibility.

At InnoVEX 2026, Taption aims to leverage this global stage to connect with startup ecosystems, venture capitalists, and strategic partners. As the demand for video content surges, multilingual subtitles have become a mission-critical tool for organizations expanding into international markets. Taption's AI-driven automation substantially reduces the time and labor traditionally required for post-production, empowering creators to overcome language barriers and reach a broader global audience.

Taption cordially invites enterprises, industry professionals, and potential partners to visit our booth during InnoVEX 2026. Attendees will have the opportunity to experience firsthand how Taption's AI technologies are shaping the future of video production and cross-language communication.

### About Taption

From independent creators to large enterprise teams, Taption is committed to becoming the leading AI subtitling and speech-to-text platform for the global market.
