

Tai-Xu Co., Ltd. to Exhibit at InnoVEX 2026

Showcasing Drone Simulators and Drone Education Equipment

Tai-Xu Co., Ltd. will participate in **InnoVEX 2026**, showcasing its achievements in the field of drone education and training. The exhibit will feature the company's **drone simulator** and a range of **drone education-related equipment**, presenting an intelligent and systematic solution for drone training and teaching applications.

The drone simulator on display offers a realistic flight operation interface and multiple scenario-based simulation functions, allowing trainees to practice in a safe and low-risk environment. It helps users become familiar with operational procedures while improving response capability and training efficiency. In addition, the company will also present various drone education devices that can be widely applied in teaching, certification practice, and professional talent development.

Tai-Xu Co., Ltd. has long been committed to the development of drone education, equipment applications, and professional training. Through its participation in InnoVEX 2026, the company hopes to connect with industry partners, educational institutions, and professionals through this international innovation platform, while further promoting the professional and intelligent development of drone education.
