# Bamboo Technology to Showcase HereHear at INNOVEX 2026

*Taiwan AI mental wellness company brings voice-native 3D AI companion “YangYang” to the international stage*

---

**TAIPEI, Taiwan — April 30, 2026** — Bamboo Technology, Ltd. (竹謙科技), a Taiwan-headquartered AI mental wellness company, today announced that it will exhibit at **INNOVEX 2026** in Taipei, where it will showcase **HereHear**, its voice-native AI mental wellness platform.

*“Mental health support exists. For most people, it is just out of reach — held back by stigma, cost, or a waitlist. We built HereHear for the moments when what people most need is a voice that simply listens.”*

— Lynia Huang, Founder and CEO, Bamboo Technology, Ltd.

At the heart of HereHear is **YangYang (洋洋)**, a 3D AI companion available in Mandarin, English, and Japanese, who responds to users in real time. The platform is built on a clinically validated voice-emotion AI engine, supported by peer-reviewed publication and independent therapeutic trials across Taiwan and Japan. Further details on the underlying clinical evidence and partnership opportunities will be announced in the coming weeks.

Bamboo Technology will be available at INNOVEX 2026 to discuss collaborations with enterprise, technology, and public-sector partners. Visitors can experience YangYang at the company’s booth.

### **About Bamboo Technology, Ltd. (竹謙科技)**

Founded in 2018, Bamboo Technology, Ltd. is a Taiwan-headquartered AI mental wellness company on a mission to make emotional support as accessible as a phone call to a friend who is awake at 2 a.m. Its flagship product, HereHear, combines a clinically validated voice-emotion AI engine with a 3D AI companion experience available in Mandarin, English, and Japanese, designed to provide immediate, anonymous emotional support that complements — rather than replaces — professional mental health care.
