Italy Pavilion InnoVEX Spotlight, Part 2:

The Future of Interaction – Biometric Freedom, Planet-Centric AI & IoT

In our final spotlight before InnoVEX 2026, the Italian Trade Agency (ITA) invites you to meet the last three companies dedicated to changing how we interact with money, our environment, and the world of travel.

MyMoney and Your Identity is Your Payment

MyMoney is building a device-free future. By linking biometric profiles to payment credentials, users can pay at retail or transport hubs with a simple gesture. No cards, no phones, just secure, privacy-by-design authentication that eliminates fraud and friction.

Studiomapp and Information Superiority for Earth

Awarded by NATO and the Pentagon's DIU, Studiomapp combines Geospatial Analysis with proprietary Computer Vision. They fuse satellite and UAV data to help organizations make informed decisions regarding climate change, environmental protection, and global security.

Travelverse and The Jolly Gateway

Travelverse introduces the Jolly Gateway, an innovative IoT solution. It integrates local AI to automate complex operations and payments seamlessly, serving as a bridge between multiple technologies in the smart-infrastructure space.

Connect With Us at InnoVEX 2026

Don't miss the opportunity to witness these Italian innovations firsthand! We invite you to visit the Italy Pavilion (Booth No. S1008) to engage with our founders, explore strategic partnerships, and discover how Italian creativity is shaping the global tech landscape. Whether you are an investor seeking the next big breakthrough, a tech enthusiast curious about hydrogen aviation, or a potential partner looking for digital transformation solutions, our team is ready to welcome you.
